In 2015, Title X–supported contraceptive services helped New York women to **prevent 59,200 unintended pregnancies and 20,000 abortions**. Title X–funded sites in New York delivered contraceptive care to 48,540 female adolescent clients (under age 20), helping them to prevent **13,300 unintended pregnancies and 3,800 abortions**.

IMPACT OF POTENTIAL THREATS TO TITLE X IN NEW YORK

If Planned Parenthood were excluded from Title X, all other types of Title X-funded sites in New York would have to increase their contraceptive client caseloads by **111 percent** to serve the women who currently obtain contraceptive care from Planned Parenthood health centers, as illustrated below.

Impact of Excluding Planned Parenthood from Title X in New York

- ■ Title X contraceptive clients served in 2015
- ■ Projected additional clients without Planned Parenthood in Title X

If all Title X funds were redirected only to federally qualified health center sites that serve at least 10 contraceptive clients a year in New York, those sites would have to **at least double their contraceptive client caseloads** to maintain the current reach of Title X.
