IMPACT OF POTENTIAL THREATS TO TITLE X IN WASHINGTON STATE

If Planned Parenthood were excluded from Title X, all other types of Title X-funded sites in Washington State would have to increase their contraceptive client caseloads by **406 percent** to serve the women who currently obtain contraceptive care from Planned Parenthood health centers, as illustrated below.

If all Title X funds were redirected only to federally qualified health center sites that serve at least 10 contraceptive clients a year in Washington State, those sites would have to **nearly triple their contraceptive client caseloads** to maintain the current reach of Title X.
